Claims Allowed

Claims 1-19 are allowable over the prior art of record. The claims are allowable because the prior art does not anticipate nor render obvious the claimed combination of: a clutch controller of a mechanical automatic transmission that enables automatic transmission operation by means of providing a mechanism with an actuator and transmission gear a clutch mechanism with an actuator, the controller comprising: engine speed detection means for detecting an engine speed; accelerator position detection means for detecting position of an accelerator; range setting means for setting an engine speed range which engine output torque falls within a predetermined range including a maximum value at position of said accelerator detected by said accelerator position detection means; and control means which effects direct engagement a clutch when a vehicle is pulled away while controlling a connected state of said clutch such that the engine speed detected by said engine speed detection means falls within said engine speed range set by said range setting means; or: a method for controlling a clutch of an automatic transmission which enables mechanical automatic transmission operation by means providing a transmission gear mechanism with an actuator and a clutch mechanism with an actuator, the method comprising the steps detecting an engine speed and the an accelerator; position of setting a first threshold value at an engine speed lower than an engine speed at which said engine output torque becomes maximum at said detected position of said accelerator and setting a second threshold value at an engine speed higher than said engine speed; and effecting direct engagement of said clutch while controlling a connected state of said clutch such that said detected engine speed falls between said set first threshold value and said second threshold value.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

No particular single feature of the claims renders the claims as a whole patentable. Only the claims taken as a whole combination is deemed new and unobvious.

Prior Art Discussed

The examiner has considered the references cited by applicant in his Information Disclosure Statement filed concurrently with the application. None of the references show all of the features of the claimed invention.

The references cited by the examiner are deemed pertinent to applicant's disclosure. None of the cited references show all of the features of the claimed invention. In particular, none of the references appear to show a range setting means and an associated control means as recited.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dirk Wright whose telephone number is 571-272-7098. The examiner can normally be reached on Monday through Friday, 8AM-4:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles Marmor can be reached on 571-272-7095. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
